

THE ABORTION CLINIC TOOLKIT – LIST OF MODULES

The Abortion Clinic Toolkit currently consists of three sections, with several videos/modules within each section. Viewing the content from start to finish takes about 1.5 hours.

SECTION 1: Abortion complications

Abortion safety (from the EXPLAINED series)

Putting things in context; a 3-minute video

Hemorrhage – part 1

*Review the basics of post-abortion hemorrhage; an 18-minute module
Hosted within the NAF Online Learning portal*

Hemorrhage – part 2

Review advanced management techniques; a 25-minute video

Perforation

*Review risk factors, signs/symptoms, and management; a 10-minute module
Hosted within the NAF Online Learning portal*

Infection

*Review prevention and management strategies; a 12-minute module
Hosted within the NAF Online Learning portal*

SECTION 2: Approaches to difficult scenarios

Existing resources offering guidance for how to manage difficult scenarios

Learn where to find the answers to tough clinical problems; a 5-minute video

Transfer and simulation

Learn best practices for transferring a patient and running simulation exercises; a 5-minute video

One example of a difficult situation: the ambivalent patient

Learn from abortion counseling expert Alissa Perrucci; a 10-minute video

SECTION 3: An orientation checklist for new clinicians: what to be sure to ask about and understand starting day one

Download the checklist document, modify it, and use it

How to get the best orientation possible

Review of what the checklist contains and how to use it; a 5-minute video
